DETAILED ACTION

Allowable Subject Matter

1. Applicant is advised that the Notice of Allowance mailed is vacated. If the issue fee has
5 already been paid, applicant may request a refund or request that the fee be credited to a deposit
account. However, applicant may wait until the application is either found allowable or held
abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that
the previously submitted issue fee be applied. If abandoned, applicant may request refund or
credit to a specified Deposit Account.
- 10 2. The indicated allowability of claims 27, 31 are withdrawn in view of the newly
discovered reference(s) to Norris, et al. (US 4,656,524). Rejections based on the newly cited
reference(s) follow.

Claim Rejections - 35 USC § 102

- 15 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the
basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on
20 sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 27-29, 31, and 33-35 are rejected under 35 U.S.C. 102(b) as being anticipated by
Norris (US 4,656,524, hereinafter “Norris”).

Re claims 27-29, Norris discloses an electronic image capture device (see abstract; col. 2,
lines 8+) comprising a photosensitive subsystem including CCD 96 (col. 4, lines 46+); an
25 optical subsystem comprising optical components such as mirrors 100, 102 and lens 90 which

Art Unit: 2876

are used in transmitting the optical information to the CCD (col. 4, line 46 – col. 5, line 6); a processing subsystem 228, 224 (col. 4, lines 10-17; col. 6, lines 7+); and a user feedback system 46 embodied as a CRT to facilitate user selection of a region of the field of view for processing during capture operation (col. 11 lines 50+; col. 12, lines 16-43). Utilizing CRT, a user can select
5 a region or a pattern he/she desires.

Re claims 31 and 33, CCD is a one-dimensional array of pixels (col. 8, lines 30+) or two dimensional array (col. 8, lines 42-46).

Re claims 34 and 35, the apparatus also contains a zoom capability (col. 1, lines 48-55).

10

Allowable Subject Matter

5. Claims 14-21, 23-26 are allowed.

6. Claim 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. If amended to incorporate subject matter in 32 into the parent claim
15 (27), perhaps optical information may be further limited to 1D or 2D bar code.

7. The following is a statement of reasons for the indication of allowable subject matter: the claims are directed at an optical reader reading and processing 1-D or 2-D code. The apparatus is designed to capture a part (or slice) of the two-dimensional barcode. User is given an opportunity to accept the captured segment via feedback. The cited references achieve such
20 feature in automated manner. Therefore such functionality is neither disclosed nor suggested by the cited references.
